Safety Data Sheet

Section 1 - Identification

Product Name Glassline GA40 Sand

Glassline Chalk CH40 Sand

Common Names Glassline Paint

Company Clay Art Center Inc

2636 Pioneer Way East Tacoma Wa 98404

Emergency Number 911

Product Use Glass fusing

Restrictions on Use None applicable

Section 2 - Hazardaus Identification

Contains Crystalline Silica > 1% Respirable

GHS label elements / Hazard pictograms

OSHA / HCS status In the liquid form this material is not considered hazardous.

If exposed to airborne dust or mist this material is considered hazardous by OSHA Hazard Communication Standard (29 CFR 1910. 1200)

Classification of the substance or mixture

OSHA - Carcinogenicity (Inhalation) - Category 1A

Specific organ toxicity (Repeated Exposure) (Resipratory tract through

inhalation) - Category 1

Signal Word Danger

Hazard Statement (H350) Cancer Hazard. Contains quartz (crystalline silica) which may cause

cancer. Risk of cancer depends upon duration and level of exposure to the dust

Not an acute hazard.

(H332) Prolonged inhalation of dust may cause lung injury. Inhalation of high concentrations of dust may cause mechanical irritation and discomfort of the

respiratory tract. Repeated exposure may have chronic effects.

Causes skin irritation. May cause an allergic skin reaction. Causes serious eye

damage.

(H316 + H320 + H335) Can cause skin, respiratory, and eye irratation.

Precautionary (P261) Avoid breathing dust

Statements (P280) Wear protective gloves, eye, and respiratory protection.

Section 3 - Composition / Information on Ingredients

Substances / Mixtures

Mixture - A trade secret claim is made for this item

Component	CAS#	Approx % by Wt.
Crystalline Silica (quartz)	14808-60-7	20
Fluorides , as F	7789-75-5	5
Zirconium or Zirconium Compounds	7440-67-7	4
Cadmium Compound	7440-43-9	1
Alumina Oxide	1344-28-1	1

Section 4 - First Aid Measures

Eye Contact	If eye contact occures, rinse immediately with plenty of water. If irritation persists, seek medical attention.
Skin Contact	If irritation occurs, wash thoroughly with water. If it persists, seek medical attention.
Inhalation	Move victim to fresh air in well ventilated area. If coughing or irritation persist, seek medical attention.
Ingestion	Do not induce vomiting. Rinse mouth thoroughly with water. Give a few small glasses of water or milk to drink. Get medical attention if any discomfort continues.

Symptoms and Effects, both Acute and Delayed

Eye Contact	Prolonged contact with large amounts of dust may cause mechanical irritation.
Skin Contact	Prolonged contact with large amounts of dust may cause mechanical irritation.
Inhalation	Inhalation of high concentrations of dry dust may cause mechanical irritation and discomfort. Long term exposure may cause chronic effects (see section 11)
Ingestion	Large quantities ingested may cause gastrointestinal irritation.
Chronic Symptoms	Repeated or prolonged exposure to respirable crystalline silica dust may cause lung damage in the form of silicosis. Symptoms will include shortness of breath, fever, fatigue, loss of appetite, chest pain, dry non-productive cough.

Section 5 - Fire Fighting Measures

General Fire Hazards Glassline mixture is not flammable and does not support fire. The plastic bottle

containing the mixture are flamable.

Extinguishing Media Use appropiate extinguishing media for surrounding fire.

Chemical Hazards from Fire

Glassline mixture does not contain hazardous decomposition products.

Protective Actions and Equipment for Fire-fighters

Glassline mixture and packaging can become slippery when wet. Fire-Fighters

should wear appropiate protective equipment.

Section 6 - Accidental Release Measures

Clean - up Methods Sponge or mop spill using plenty of water.

Personal Precautions and Personal Protection Equipment

Personal Precautions Wear appropriate protective equipment and clothing during clean-up. When dry sweeping

use NIOSH approved respirators when dust levels exceed exposure limits.

Enviromental

Precautions

None

Emergency Procedures and Methods of Containment There is no emergency procedures required for this mixture. Place dry powder in

a sealed container for proper disposal.

Section 7 - Handling and Storage

Precations for Safe Handling Use proper lifting techniques to avoid injury.

Recommendations on the Conditions for Safe Storage

Store in a clean dry location.

page 3-7

Section 8 - Exposure Counts ? Personal Protection

Airborne Exposure Limits

Hazardous Ingrediant	Wt. % Aprox.	CAS#	OSHA PEL* / ACGIH TLV
Crystalline Silica (quartz)	20	14808-60-7	0.1 mg/m3 / 0.025mg/m3 respirable
Fluorides , as F	5	7789-75-5	2.5 / 2.5
Zirconium or Zirconium Comp	oounds 4	7440-67-7	5 / 5
Cadmium Compound	1	7440-43-9	00.5 / 0.01
Alumina Oxide	1	1311-28-1	5 mg/m3 / 10 mg/m3

Engineering Measures Provide sufficient ventilation for operations causing dust formation.

Observe occupational exposure limits and minimize the risk of exposure.

Personal Protective Equipment (PPE)

Respiratory If engineering controls do not maintain airborne concentrations below

recommended exposure limits an approved respirator must be worn. Use a NIOSH/MSHA approved air purifying respirator as needed to

control exposure.

Eyes Wear approved safety googles.

Skin and Body It is a good industrial hygiene practice to minimize skin contact. For

prolonged contact use suitable protective gloves.

Section 9-- Physical and Chemical Properties

Appearance	Dry Powder	Evaporation Rate	Not Applicable
Color	Beige	Solubility in Water at 100c None	
Physical State	Liquid	Viscosity	Not Applicable
ph	6-8	Flashpoint	Not Applicable
Odor	low to none	Boiling Point	Not Applicable
Odor Threshold	Not Applicable	Flammability	Not Applicable
Melting Point	Not Applicable	Vapor Pressure(mm HG)	Not Applicable
Freezing Point	Not Applicable	Vapor Density	Not Applicable
Relative Density /		Partrician coefficent	Not Applicable
Specific Gravity	1.76 (H2O=1)	Auto Ignition Temp.	Not Applicable

Section 10 - Stability and Reactivity

Reactivity No dangerous reactions are known under normal conditions of use.

Chemical Stability Material is stable under normal conditions.

Possibility of Hazardous

Reactions

Hazardous polymerization does not occur.

Conditions to Avoid Airborne dust

Incompatible Materials None

Hazardous Decomposition

Products

None

Section 11-- Toxicological Information

Primary Route of Exposure Skin, Eye Contact, Inhalation and Ingestion.

Specific Organ Toxicity

Single Exposure

Target organs include Skin and respiratory system

Specific Organ Toxicity Repeated Exposure Cause damage to eyes, skin and respiratory system

through prolonged or repeated exposure.

Acute Short Term Exposure Effects

May cause eye irritation, skin irritation and respiratory tract irritation Inhalation of high concentrations of dry powder may cause mechanical irritation and discomfort. Long term exposure may cause chronic effects.

Chronic Long Term Exposure Effects

Silica has been classified by OSHA as a human lung carcinogen. Repeated or prolonged exposure of respirable crysalline silica dust may cause lung damage in the form of silicosis. Effects of silicosis include bronchitis/chronic obstructive pulmonary disorder, increased susceptibility to tuberculisis, sclerderma (a disease affecting skin, blood vessels, joints and skeletal muscles),and possible renal disease. Acute silicosis can be fatal.

renai disease. Acute silicosis can de fatal.

Related Symptoms Symptoms will include shortness of breath, fever, fatigue, loss of appetite, chest

pain, dry non-productive cough.

Medical Conditions
Aggravated by Exposure

Individuals with pre-existing allergies, eye disorders, skin disorders, respiratory

disorders may have increased susceptibility to the effects of exposure.

Section 12-- Ecological Information (non-mandatory)

Biochemical Oxygen Demand (BODS)
Chemical Oxygen Demand (COD)
Products of Biodegradition
Toxicity ot the Products of Biodegradation
Bioaccumulation Potential
Potential to MKove from Soil to Groundwater
None Known

Personal Protection Refer to section 8 for proper PPE when disposing of waste material.

Appropriate Disposal Containers Standard waste disposal containers - no special requirements.

Appropriate Disposal Methods Disposal of this product should comply with the requirements of

enviromental protection and waste disposal legislation and any

regional or local authority requirements.

Physical and Chemical Properties

that May Affect Disposal

Dry dust should be placed in a sealed container or in a manner that

reduces or eliminates the release of the product.

Swage Disposal No precautions

Special Precautions for Landfills

or Incineration Activities

There are no special precautions for disposal in a landfill. This product

is non-combustible and is not suitable for incineration.

page 6-7

Section 16 -- Other Information (non-mandatory) continued

Three types of TLVS for chemical substances as defined by the ACGIH are:

TLV-TWA Time weighted average - average exposure on the basis of an 8 h/day, 40h/week

work schedule.

TLV - STEL Short - term exposure limit - spot exposure for a duration of 15 minutes, that can

not be repeated more than 4 times per day, with at least 60 minutes between

exposure periods.

TLV-C Ceiling limit - absolute exposure limit that should not be exceeded at any time.

This SDS is in compliance with The Globally Harmonized System of Classification and Labeling of Chemicals (GHS) and is subject to revision at any time without notice. Its current revision date is: 11/25/2016

Information presented herein has been compiled from sources considered to be dependable and is accurate and reliable to the best of our knowledge and belief but is not guaranteed to be so. Nothing herein is to be construed as recommending any practice or any product in violation of any patent or in violation of any law or regulation.
